

1. Name of your university/institution/industry or company interested in participating in TEMPUS project: Donetsk State University of Management, Donetsk, Ukraine (www.dsum.edu.ua)

2. Main field of activities of your institution:

Donetsk State University of Management is a State-run higher education establishment founded in 1992 and accredited by the IV the highest level of national accreditation.

Today the University enrolls 8000 students. Training is carried out on the following education-and-qualification levels (full-time and part-time): Bachelor, Specialist/Master and MBA in various management-related fields like management, economics, sociology, marketing, foreign trade, environmental management, banking and finance, law, public administration etc.

3. Information about the intended TEMPUS project:

Our university is searching for *grantholder* and *partner institutions* from the EU and Ukraine for the following projects:

Joint Projects – Curriculum Reform: «Master Program for IT Teachers».

Structural Measures – Higher Education and Society: «Center of the Third Age Education».

4. Project proposal/description:

JPCR «Master Program for IT Teachers»

The idea is to create and introduce master program for training of IT teachers for secondary education establishments.

Key aspect in this project is elaboration and development of master studies in line with the EU standards and accreditation of new Master Program as a basis for satisfying the demand of secondary education establishments in qualified IT teachers as there no existing master program in Ukrainian HEI in this specific area.

SMHES «Center of the Third Age Education»

The idea is to create Center of the third age education and training within the post-diploma training program. The Center will be a structure which aims to provide education for retired members of the local community - those in the third age of life.

5. Previous international experience:

DSUM cooperates fruitfully with 46 foreign universities and education institutions, participates in the international projects under TEMPUS, Jean Monnet, DAAD, UNDP, IREX, Fulbright, Visegrad Fund and other. Full list of the projects can be found at web-site of the university.

International relations of DSUM include cooperation with educational institutions in Europe, North America and Asia. Many of these interrelations provide international exchange opportunities for students and lecturers.

Main vectors of the University international activity are: establishing international inter-institutional links for study and research programs, developing students and faculty exchange programs, internationalization of the curricula, participation in the international grant programs.

6. Please contact: (person, position, mail, skype, tel etc.)

Mrs. Irina Sikorskaya, PhD, Head of International Relations Office, e-mail intdep@dsum.edu.ua, tel. +38 062 3440957, fax +38 062 3377108

Lviv Academy of Commerce, TEMPUS V

Partner Offer Profile

Lviv Academy of Commerce (LAC) is an educational institution of IV accreditation level with about 200-year history. The work of the institution is aimed at improvement of higher education, establishing modern system of methodological and information providing of consumer cooperation, moving to the dynamic system of specialists' preparation. There are about 455 lecturers, including 5 academics, 28 doctors of sciences and professors, 210 candidates of sciences and associate professors, more than 8000 students at the Academy. Academy has five educational buildings, a library with more than 500000 titles, four student hostels, computer center with laboratories.

There are 3 institutes and 5 faculties in LAC, which train bachelors, specialists and magistrates in the specialities:

Institute of Finance and Economy,

Management faculty (Economic Cybernetics; Enterprise Management),

Law faculty,

Faculty of International Economic Relations,

Faculty of Commodity Science and Commerce,

Pre-Educational Training Department, Institute of Postgraduate Education,

Extra Mural Faculty,

External Courses,

Institute of Informational Technologies,

Department of International Relations and Strategic Development.

LAC has its educational complex “Academy” having colleges, technical and specialized schools, and over 30 Lviv secondary schools as its members. The structure of LAC also includes scientific-research laboratories, business-centre “Intereconomy”, centres of business English and French, publishing house and employment agency.

Academy has recently started cooperation with several higher educational and research institutions of Ukraine, Russia, Byelorussia, Moldova, Kazakhstan, Austria, Hungary, France, Germany, Poland. The aim of the contacts – exchange of teacher-professor faculty and students, introduction of joint curricula and methodological materials on economy of business, management, auditing, marketing, banking and humanitarian sciences. In 2012 LAC was selected for La Manche Project.

Interests for cooperation:

- Modernisation of curricula
- Development of study programmes with a double degree
- Methodological support for multilevel education
- Establishment of sustainable structures for quality assurance
- Introduction of common projects in the field of cooperative movement
- Quality of International student mobility
- Development of International relations department

TEMPUS IV, 6th Call for Proposals

PARTNER SEARCH FOR COOPERATION IN TEMPUS IV PROJECT

1. State Higher Education Institute “Pryazovskyi State Technical University”

www.pstu.edu

2. General information about the university

The university offers graduate programs (bachelor and master), post-graduate programs (CandSc and DSc), and professional educational programs for students from the Azov Sea region, Ukraine and other countries.

Forms of training: full-time, distance education, preparatory department.

Fields of training and research include engineering (electrical, mechanical, welding, metallurgical, logistics, environment protection); production automation and computer science; economics; translation studies; social work.

3. Information about the intended TEMPUS project:

Consolidation of Curriculum in Material Science and Development of New Modules to Ensure a Smooth Transfer Between BSc, MSc and PhD Programs in Ukraine (Russia, other NIS countries)

4. Project proposal / description

Projected activities:

1. Analysis of the existing curricula (bachelor, master) in Materials Science and in the study programs which belong to this subject area at the universities in Ukraine, Russia and other NIS countries with the aim of their modernization to meet the demands of the employers and the labour market.
2. Development and implementation of new disciplines in Materials Science subject area:
 - for bachelors: Resource saving production and economical alloying of materials;
 - for masters: Fundamentals of materials and technologies selection; State-of-the-art nanomaterials and nanotechnologies; Application fields and interchangeability of the materials; Advanced technologies for materials strengthening.
3. Development and implementation at the target universities of a new infrastructure for practice-oriented training using the modernized curricula and new disciplines (pp.1,2) – establishing new study laboratories and integration of new software products into the study process on the basis of the experience of European universities.
4. Consolidation and harmonization of curricula and syllabus across master and PhD programs in Materials Science, Metal Science and Heat Treatment of Metals.
5. Implementation at target universities of European system of accumulation of credit points (Credit Transfer System “ECTS”) for modernized and new disciplines. Development and implementation of recommendations on mutual recognition of study periods abroad across the consortium universities to ensure students’ and teachers’ mobility.
6. Development of syllabus (set of course materials) for modernized and new disciplines.

7. Organisation of trainings for target universities representatives.
8. Setting up of a new infrastructure at target universities for enhancing liaison across universities and industrial partners, involving students, graduates, employers into this work.

9. Previous international experience:

Tempus – Project JEP - 22243-2001

DONETSK RAILWAY TRANSPORT INSTITUTE is looking for partners in Tempus project

1. Name of institution interested in participating in TEMPUS project:

Donetsk Railway Transport Institute (DRTI) Ukrainian State Academy of Railway Transport

<http://www.drty.donetsk.ua>

2. Main field of activities of institution:

State higher educational establishment “Donetsk Railway Transport Institute” of Ukrainian State Academy of Railway Transport of the Ministry of Transport and Connection of Ukraine created in 1967 today being one of the leading educational center for railway transport in Ukraine.

The institute consists of 6 faculties (“Railway Operation on Transport”, “Infrastructure of Railway Transport”, “Transport Economy”, “Correspondence Faculty”, “Retraining and Upgrading Qualification Faculty”, “Preparatory Faculty”) and 12 departments among them 7 are graduation chairs Research and education activities of DRTI are aimed at transport industry.

3. Information about the intended TEMPUS project:

We look forward to cooperate in terms of sharing experience, developing new research tools and methods, applying new technologies to the learning process, establishing multilateral academic exchanges and developing the long-term basis for cooperation.

Our joint researches could address following issues:

- University management and student services;
- Introduction of quality assurance;
- Knowledge triangle education/research/innovation.
- Improvement existing education system
- Development partnerships between Ukrainian and European institutions as tool to promote academic excellence, integration and cooperation;
- Preparation and implement joint bachelors’ study programs in accordance with EU educational standards – to promote an international student mobility programs as a key to improve academic educational quality;
- Institutional and financial autonomy;
- Development of lifelong learning program.

4. Project proposal/description:

- We are searching for partners to modernize Bachelor level Programs in transport engineering and transport economy. And it aims to create joint/double degree programs.
- We are interested in joint projects focused on development of international relations, knowledge triangle education-research-innovation, University management and services for students.

- We would like to expand the international cooperation in the area of public and municipal administration and suggest a partnership in the following areas: development of high education system organized in Bachelor level study according to the Bologna process; realization of joint science research projects; development of the teaching materials for the Bachelor program and implementation of the new curriculum; organization of training courses for young faculty members in Ukraine and Europe and development of academic mobility in Ukraine and Europe.

Please contact: Sergiy Tsykhmistro, a head of IT department, curator of the International Relations of Donetsk railway transport institute.

Lviv National University of Veterinary Medicine and Biotechnologies named after S.Z. Gzhytskyi.

Main fields of activities:

Veterinary studies;

Veterinary pharmacology;

Veterinary obstetrics;

Veterinary surgery;

Animal virology;

Animal diseases;

Food technology;

Bioengineering;

Economics and management.

Information about the intended TEMPUS project: Our University is interested in cooperation in the study and exchange of the students and lecturers in the spheres of Veterinary studies, Food technology, Bioengineering, Economics and Management.

Project proposal/description:

Cooperation concerning the educational process and scientific-research projects;

Cooperation in publishing manuals, books and articles;

Organization of joint conferences and seminars;

Exchange of the students and lecturers;

The Lviv National University of Veterinary Medicine and Biotechnologies named after S.Z. Gzhytskyi cooperates with the following higher educational institutions:

Szent István University (Hungary);

Wroclaw University of Environmental and Life Sciences (Poland);

University of Agriculture in Krakow (Poland);

University of Life Sciences in Lublin (Poland);

Warsaw University of Life Sciences (Poland);

Latvia University of Agriculture Jelgava (Latvia);

Purdue University (USA);

PARTNER SEARCH FORM FOR COOPERATION IN TEMPUS IV PROJECT

1. Name of your university/institution/industry or company interested in participating in TEMPUS project: National University «Odessa Law Academy»

2. Main field of activities of your institution:

University as a leading Ukrainian law university has a history dating back to the beginning of the XIX century. Main field of activities of the University: educational, methodological and research activity; international cooperation. The main subject areas covered by education and research are law, political science, intellectual property, consolidated information, public services. There are about 15 thousand students at 3 institutions and 12 faculties. Currently the University aims at further internationalization of education and introduction of greater number of Master courses, including courses taught in English and other foreign languages.

3. Information about the intended TEMPUS project:

We look forward to cooperate in terms of sharing experience, developing new research tools and methods, applying new technologies to the learning process, establishing multilateral academic exchanges, preparing and implementing joint bachelors' and postgraduate study programs in accordance with EU educational standards and developing the long-term basis for cooperation. The need for using multimedia to increase awareness in the educational environments will provide students with opportunities to retrieve and activate their schemata, i.e.

background knowledge and using tools for analyzing the world, accessing and interpreting information, organizing their personal knowledge, and sharing their own knowledge with others; get the students engaged in filling multimedia applications which provide valuable learning opportunities; empower students to create and design their own formats rather than absorbing models created by others; encourage deep reflective thinking which may lead to autonomous learning. and improve existing educational system and bring it closer to European standard.

4. Project proposal/description:

We are interested in joint projects focused on development of international relations, knowledge triangle education-research-innovation, University management and services for students. We would like to expand the international cooperation in the area of public and municipal administration and suggest a partnership in the following areas: development of high education system organized in three levels – Bachelor, Master and Doctor studies according to the Bologna process; realization of joint science research projects; development of the teaching materials for the Master and PhD program and implementation of the new curriculum; organization of training courses for young faculty members in Ukraine and Europe and development of academic mobility in Ukraine and Europe.

5. Previous international experience:

Since 1998 National University “Odessa Law Academy” has been a member of European Association of Universities. In 2006 the University one of the first in Ukraine signed Magna Charta Universities. Since 2008 the University has been a member of European Association of Public Law. For the last years it has been concluded more than 50 long-terms agreements about collaboration with leading universities of countries of Europe and the USA, influential international governmental and non-governmental organizations. National University has taken part repeatedly in realization of scientific and research, technical and humanitarian projects of European Union and UN. In 2002-2004 University was a partner organization of the project “Legal training in Ukraine, Kiev and selected regions. EuropeAid/111910/C/SV/UA. Experts’ Briefing Pack”. In 2012 University became a partner organization in the project “Supports of innovations through improvement of regulatory framework for higher education in Ukraine. 530158-TEMPUS-1-2012-1-SE-TEMPUS-SMHES”. There are held conferences and symposiums at the University which results influence on development of legal science and practice not only in Ukraine, but also in Europe in the whole. Every year foreign scientists and lawyers work at the University reading their own designers courses in English, currently more than 350 foreign students from 26 countries of the world study at the University.

Lutsk National Technical University; Department of Packaging and Automation of Production Processes is looking for partners and an applicant/grant holder. <http://www.lutsk-ntu.com.ua>

Main field of activities: Higher education organization in two levels-Bachelor and Master in mechanical engineering, automation; PhD Program in Automation of Production and Control Processes.

Information about the intended TEMPUS project:

Establishing Modern Master Studies in Mechanical Engineering, Information Technologies in Design of Machines and Manufacturing

Project proposal/description:

Exchange, development, implementation of new curricula

Exchange of experience concerning educational process and scientific-research projects

Exchange and joint edition of educational manuals, methodical materials, scientific-methodical and academic literature

Organization and carrying out joint scientific-practical conferences and seminars

Implementation of the new curricula for Master students, especially related to

CAD/CAM/CAE and PDM systems for mechanical engineers;

CALS technologies;

Industrial design;

Rapid prototyping;

Computer aided synthesis, modelling and optimization of technological complexes and FMS;

Automation and control systems, CNC.

The newest laboratory equipment supply at Universities-Partners.

Development of academic mobility in Ukraine and Europe.

Previous international experience:

510920-Tempus-1-2010-1-De-Tempus-JPCR Practice Oriented Master Programmes in Engineering in Russia, Ukraine and Uzbekistan "PROMENG" (2010-2013)

PARTNER SEARCH FORM FOR COOPERATION IN TEMPUS IV PROJECT

1. Name of your university/institution/industry or company interested in participating in TEMPUS project:
National Technical University of Ukraine "Kyiv Polytechnic Institute", College of Electronics

2. Main field of activities of your institution:

College of Electronics of National Technical University of Ukraine "Kyiv Polytechnic Institute" is one of the largest producer of electronic and electrical engineers in Ukraine. It consists of 7 Departments:

- Department of Microelectronics;
- Department of Industrial Electronics;
- Department of Physical and Biomedical Electronics;
- Department of Electronic Digital Equipment Construction;
- Department of Acoustics and Acoustoelectronics;
- Department of Electron Devices;
- Department of Sound Technique and Information Registration.

More information about College and research activity:

<http://fel.kpi.ua/international/> <http://biowave.org.ua/>

3. Information about the intended TEMPUS project:

Development of joint/double PhD and MSc programs in biomedical engineering

4. Project proposal/description:

To prepare and implement joint PhD and/or MSc program in methodology, algorithms, software and hardware for biomedical electronic systems for diagnosing various human diseases and also for e-health applications.

Our actual interests in educational activity

- Electronic and information biomedical systems
- Biosignal analysis and processing

Scientific interests

- brain electrical activity analysis, epilepsy diagnostics, epileptic patterns' localization
- heart rate variability analysis
- depth of anesthesia monitoring
- adaptive signal decompositions, overcomplete basis function's dictionaries
- pattern recognition, adapted templates, metrics and similarity measures
- adaptive signal and image processing, wavelet transform, new signal transforms in diagnostics, therapy and monitoring
- nonstationary signals' analysis, higher-order spectral analysis
- chaoticity of brain dynamics with applications to diagnostics
- structural analysis of EEG and ECG
- respiratory sounds analysis
- nano-bio-sensors simulation technique

Main achievements

- Technique for epileptiform pattern automatic localization
- Technique for automatic hearing diagnostics based on auditory brain response potentials
- High-resolution ECG analysis system
- Technique for power-line noise adaptive suppression
- Technique for EEG signal simulation for various conditions
- Biopotential electrodes modeling in non-normal conditions
- Technique for HRV multiscale analysis
- Model of immune nanotube-based FET sensor

1. Name of non-profit organization interested in participating in TEMPUS project:

NGO “TERRA TAVRIDA”, Crimea, Ukraine

2. Main fields of activities of your institution:

- Recent development of museums and museum;
- IT-tools in education;
- Programs of mobility;
- Reforms in education;
- Promote research and teaching activities of teachers, young scientists and students;
- Support the implementation of scientific, cultural and creative interests;
- Coordinate and assist in expanding the methods and tools for reliable and timely information exchange.

"Terra Tavrida" collaborates with scientists and university teachers and organizations in the USA, Italy, Spain, Portugal, Russia, using personal time and other resources. The cooperation framework is constantly expanding, to work actively recruited student volunteers from Ukraine, Germany, Italy, India and Algeria.

Our organization is involved in Tempus projects (516721-TEMPUS-1-2011-1-RO-TEMPUS-JPCR) and other programs, and we are open for cooperation.

additional info in attach: <https://docs.google.com/open?id=0B0hdbkOtNWtHTVV6MFFrMnRpVzQ>

3. Our organization is interested in participating in projects in areas:

- Reform of the educational process;
- Museums and museums;
- Establish mechanisms for effective response to global threats;
- Active participation in the coverage problems of humanity, JIT-reaction;
- Distance learning teaching; virtual university;
- Information security, technology and tools.
- Ethical, cultural and legal aspects of information technology.

1. Name of your university/institution/industry or company interested in participating in TEMPUS project:

Higher Educational Institution of Ukoospilka “Poltava University of Economics and Trade”
(www.pusku.edu.ua)

2. Main field of activities of your institution:

Educational, methodological and scientific activity and international cooperation

High education organized in three levels – Bachelor, Master and Doctors studies.

The University trains high-skilled specialists in finance, accounting and auditing, international economics, economics of an enterprise, management, personnel management and labour economics, informatics, economical cybernetics, marketing, hotel and restaurant business, food technology and engineering, commodity research and commercial business.

The University prepares science researchers in the spheres of economic theory and history of economic thought, economics and management of national economy, economics and management of enterprises (by economic activities), money, finances and credits, accounting, analysis and audit (by economic activities); commodity research, theoretical foundations of computer science and cybernetics, food technology, history of Ukraine, world economy and international economic relations, theory and methodology of professional education, demography, labour economics, social economics and politics.

3. Information about the intended TEMPUS project:

We look forward to cooperate in terms of sharing experience, developing new research tools and methods, applying new technologies to the learning process, establishing multilateral academic exchanges and developing the long-term basis for cooperation.

Our joint researches could address following issues:

- University management and student services;
- Introduction of quality assurance;
- Knowledge triangle education/research/innovation.

4. Project proposal/description:

Development of the newest Master and PhD program.

Development of the teaching materials for the newest Master and PhD program.

Implementation of the new curriculum for Master and PhD students.

The newest laboratory equipment supply at Ukrainian Universities-Partners.

Organization of training courses for young faculty members in Ukraine and Europe.

Development of academic mobility in Ukraine and Europe.

5. Previous international experience:

1. Cooperation with the TACIS project "Support to SMEs in rural areas" (Icon-Institute (Netherlands), funding - the EU, 2005-2006).

2. Cooperation with the World Bank project in Ukraine "Expanding of Access to Financial Services Markets" P 4020-UA/1.6.2-IC (Ministry of Finance of Ukraine, 2005-2006).

3. Cooperation with the Canadian program of strengthening of credit unions in Ukraine (The Canadian Cooperative Association, the funding - the Canadian International Development Agency CIDA, 2006-2008).

4. Cooperation with the Higher School of Agronomy, Environment and Food Technologies of University of Dijon (France, 2010).

International language programs

- Center of French Language and Culture, Center of German Language and Culture, Azerbaijan Cultural Educational Center, Cultural and Linguistic Center of China – increase of cultural and linguistic competence of learners with the purpose of participation in the double-degree program.

Double-degree programs

- Within TEMPUS project (PROGRAMME TEMPUS 144920 - TEMPUS - 2008 - FR.JPCR) - Trans-European Mobility Programme for University Studies) PUET and Professional University Institute "Management and Management of enterprises" of University of Auvergne (France) prepare high-skilled specialists in management of foreign economic activity and international economics and give students opportunity to get two diplomas.

- The MBA educational program of PUET and University of Nicosia (Cyprus) gives a chance to study Business Administration in both universities and to receive MBA diplomas of University of Nicosia and of PUET upon graduation.

- The educational Master program together with ISMA Graduate School (Riga, Latvia) enables students to get solid foreign education and double diploma in management of foreign economic activity.

1. Name of the university interested in participating in TEMPUS project:

International name: **CRIMEAN UNIVERSITY OF CULTURE, ART AND TOURISM.**

National name: Кримський університет культури, мистецтв і туризму.

2. Main field of activities of your institution:

Educational, methodological and scientific activity; international cooperation.

In 2012 the University in general was granted the third level of accreditation.

This year new specialty of Tourism was added to the list.

Crimean University of Culture, Arts and Tourism has four faculties:

- Faculty of Socio-Cultural activities,
- Faculty of Theatre Arts,
- Faculty of Art of Music,
- Faculty of Choreography.

3. Project proposal/description

We are searching for partners to modernize Master level Programme in Tourism, Modern and Folk Choreography. The experience of European universities and art schools is of a high value to create joint/double degree programs.

4. Information about the intended TEMPUS project (aim, objectives etc):

The main aim of University is to improve existing education system and approach it to European educational standards.

Work within "Higher Education and Society" national priorities:

- Development of university's partnerships with business,
- Knowledge triangle: education - innovation –research.

Work within the following regional priorities:

I. Reforming of curricula and programs for Tourism.

II. Management Reform:

- University's management and student services,
- Institutional and financial autonomy,
- Development of International Relations.

III. Higher Education and Society:

- Development of cooperation with enterprises,
- Development of lifelong learning program.

5. Previous international experience:

2012 Master Classes "Jazz Broadway" by Rebecca Davis (grant confirmed, visit in September), Fulbright Program, USA,

2012 Classical dance examination, Ballet school, Dublin, Ireland

2011 Conference on the choreography, Orel State University, Russia,

2011 Professional development training, State Public Scientific Technical Library, Moscow, Russia,

2011 Master Class "Bulgarian folk dance", Crimean Hilendarski Bulgarian Society, Bulgaria,

2011 Research in the field of archeology. Conference. The Hermitage, St. Petersburg, Russia,

Since 2010 Opening of Confucius Institute at the University (in progress), Hebei University of Science and Technology, China,

2008 Ethnic Village - "Crimean World" - Visegrad Fund,

2007 Conference "National Interests of Ukraine", USA Embassy, Fulbright Program, International Renaissance Foundation,

2006 The Program "Crimean World", First Stage. Making of Photo album "Crimea. Armenians. Ten Centuries of Creation", Armenian Society of Crimea, Republican Committee in the field of Nationalities and Deported Citizens, 2006.

1. Name of your university/institution/industry or company interested in participating in TEMPUS project:

Donetsk National Technical University (DonNTU)

2. Main field of activities of your institution:

Donetsk National Technical University (DonNTU) was created in 1921, today being one of the leading technical universities in Ukraine. It is a large R&D center, based on principles of coherence of scientific activities and teaching process quality improvement. University consists of 6 institutes and 25 faculties, providing educational services to approximately 28000 students. Research and education activities of DonNTU are aimed at such industries as coal mining, metallurgy, heavy machinery, ICT. University also includes the Institute of Economics and Management.

3. Information about the intended TEMPUS project:

We are looking forward to cooperation in both Joint Projects aimed at modernization of curricula in academic disciplines (due to the specialization of our University and national priorities) and Structural Measures Projects.

4. Project proposal/description:

We are particularly interested in forming a consortium for realization of the structural measures project, which main purpose would be the formation of efficient institutional and legislative basis for Distance Learning in Ukraine.

5. Previous international experience:

DonNTU is a member of 22 international organizations, among which the UNESCO International Centre for Engineering Education and the European Society for Engineering Education. DonNTU has partner relations in scientific and educational spheres with about 147 educational institutions from all over the world and 30 foreign enterprises. Among the examples of efficient international cooperation are German Technical Faculty, created in 1992 in cooperation with Magdeburg Otto von Guericke University (Magdeburg, Germany) under the support of the "Siemens" company and DAAD and an authorized centre for learning and research in automation of production processes, created in 2008 in cooperation with "Schneider Electric" corporation.

DonNTU has an experience of participation in 6 TEMPUS projects. The most recent are:

TEMPUS UM_JEP - 27085-2006 (COIN) "Establishment of mechanism of cooperation and interaction between universities and industry at the regional level as an element of development strategy of universities" (beneficiary organization - University of Lodz (Poland));

TEMPUS CD-JEP 27238-2006 "Development of cooperation between universities and enterprises in the Eastern Ukraine for teaching of economics and management" (beneficiary organization - Universite Pierre Mendes Grenoble (France));

TEMPUS 144641-TEMPUS-1-2008-1-FITEMPUS-JPCR (INTOUR) "International networking for modernization of tourism education and developing academic mobility" (beneficiary organization - Savonia University of Applied Sciences (Finland)).

Poltava National Pedagogical University named after V.G.Korolenko is looking for the partners

1. Tempus project proposition – the name of the project proposition "The development of the joint Master's training programme for innovative management of educational institutions".

2. Tempus project proposition – the name of the project proposition "Making the ties of the University with educational institutions stronger: provision for a stable development of educational institutions in common educational scope on the basis of innovative management".

Contact person: doctor of education, Professor Grinyova Marina Viktorivna, the head of the department of pedagogical skills and management, the dean of the faculty of natural sciences, Poltava National Pedagogical University named after V.G.Korolenko.

Phone / Fax: 8(0532) 560319, E-Mail: grinovam@rambler.ru

1. "The development of the joint Master's training programme for innovative management in the sphere of globalization and euro integration".

2. Project objective: generalization of Master's professional training experience, chief subject "Management of educational institutions", as far as innovative management in the sphere of globalization and euro integration is concerned.

3. Project goals:

- Negotiating treaties as to cooperation with The Highest School of Education (Łódź, Poland); The Highest School of Pedagogics and Administration (Poznan, Poland); National College of school managers (Nottingham, Great Britain); Educational and Training Centre of the Netherlands, ETCN; Westphalian University named after William (Münster, Germany); School Leadership - Harvard Graduate School of Education (Harvard, Great Britain) and others.

- Setting up the Centre of generalization of Master's professional training experience, chief subject "Management of educational institutions", as far as innovative management in the sphere of globalization and euro integration is concerned.

- Lecturers' and undergraduates' mobility support.

- Lecturers' language training for them to work in poly-cultural environment.

- The development of the joint Master's training programme for innovative management in the sphere of globalization and euro integration.

- Making web-platforms to hold web-conferences, web-seminars, web-lectures.

- VC equipment PC, DL

- The development of teaching and methodological facilities.

- The development of practical facilities. Setting up practice bases in different countries.

- The development of textbooks and manuals.

4. National priority of Ukraine: the development of scientific and innovative activities in the sphere of education and its improving on the basis of innovation.

5. Regional project

6. The University in Ukraine: Poltava National Pedagogical University named after V.G.Korolenko

7. Contact person: doctor of education, Professor Grinyova Marina Viktorivna, the head of the department of pedagogical skills and management, the dean of the faculty of natural sciences, Poltava National Pedagogical University named after V.G.Korolenko.

Phone / Fax: 8(0532) 560319

E-Mail: grinovam@rambler.ru

8. Partners in Ukraine:

- Kirovohrad State Pedagogical University named after Vynnychenko

- Classical Private University (the Institute of informational and social technologies) Zaporizhia, Ukraine.

- Uman State Pedagogical University

- Luhansk National University named after T.G. Shevchenko
- Cherkasy National University named after B. Khmelnytskyi
- Sumy State Pedagogical University Named after A.S. Makarenko
- Borys Grinchenko Kyiv University

Mariupol State University is looking for partners in Tempus project

1. Name of your university/ institution/ industry or company interested in participating in TEMPUS project:

International name: Mariupol State University www.mdu.in.ua

2. Main field of activities of your institution:

Educational, scientific, methodological and international cooperation

3. Information about the intended TEMPUS project:

The main aim of the project is to strength and promote cooperation between Ukrainian and European universities as tool to share and efficiently utilize scarce human and material resources - to prepare and implement joint postgraduate study program in accordance with EU educational standards - to promote inter country student mobility program as a tool to improve academic education quality - to promote involvement of all stakeholders in process of curriculum development to create education in accordance with society needs and EU standards.

4. Project proposal/ description:

We are looking for an EU-partner (University) who's ready to be the applicant/ grant holder of the abovementioned project.

5. Previous international experience:

Programme or initiative Reference number Beneficiary Organization Title of the Project

TEMPUS MODEP ETJ - JP - 00408-2008 University Overn-Clermon-1 (France) (MODernisation et DEVELOppement de cours Professionnalises

Contact person :

Mykola Trofymenko, Vice-Rector for International Relations of Mariupol State University, PhD (Political Science)

Tel./fax +38 0629 53 22 51, +38 0629 53 22 60

e-mail: mariupol.university@gmail.com, mykola.trofymenko@gmail.com

Ternopil Institute of Social and Information Technologies

Project Title : Knowledge Mobility for Social Integration and Economic Interaction

Target group: students, graduates, faculties, entrepreneurs, executive management of industry enterprises, local community administration staff.

Coordinator: Bakushevych Ivanna, Professor, PhD, Fulbr. Professor

Contacts: phone: +380677940830, e-mail: ibakushevych@gmail.com

Project goals and objectives:

1. Exchange of scholars for the collaborative educational programs and methods of instruction of academic disciplines development, with the inclusion of distance education technologies, education for people with special needs and the elderly ('third millennium university');
2. Student exchange: organizing study tours and internship on socially-oriented companies in different regions of EU and Ukraine; providing social events, arranging social activities; on-site trainings in ecology-friendly firms and companies providing ecological services (including agro - consulting), student volunteer projects aimed at promoting local communities, work in orphanages, shelters for the homeless, and other welfare institutions;
3. Collaborative promotional activity of the project participants for local and international networking of the regions to impact the shaping of public opinion in the areas of ecology, the social responsibility of business and social support of vulnerable groups;
4. The creation of the knowledge triangle: education– research– innovation to promote knowledge and technologies transfers of social and business innovations among partnering universities, foreign companies by organizing international forums, conferences, research projects (together with the Ternopil Institute of agricultural production, Ternopil research station of the Institute of Veterinary Medicine, the Institute of Regional Research of the National Academy of Sciences, as well as a network of business incubators and technology transfer centers in Ukraine and Poland;
5. Developing common quality standards of governance of processes of innovative, socially-oriented entrepreneurship and promotion of a healthy lifestyle; implementation of European quality standards into environment-friendly manufacturing and service processes, as well as revitalization processes of depressive territories.

Project coordinator in Ukraine:

The Ternopil Institute of Social and Information Technologies (TISIT)

tel.: 0352 528310, fax: 0352 523996, e-mail: info@tisit.edu.ua

Responsible person:

Bakushevych Ivanna, Vice-Rector for International Affairs and Scientific Development

Contacts: phone: +380677940830, e-mail: ibakushevych@gmail.com

PARTNER SEARCH FORM FOR COOPERATION IN TEMPUS IV PROJECT

1	Name of your university/institution/industry or company interested in participating in TEMPUS project:	Ukraine Ivano-Frankivsk National Medical University
2	Main field of activities of your institution:	<ul style="list-style-type: none"> – Higher medical education for students at such specialties: “General Medicine”, “Pediatrics”, “Dentistry”, “Pharmacy”. About 4 600 Ukrainian students + 900 Foreign students per year; – Postgraduate education for doctors. About 3 600 doctors per year; – Scientific work in fields of Biology, Anatomy, Internal Medicine and many others medical areas; – Therapeutic work in University’s clinic, city hospitals and other medical centers.
3	Information about the intended TEMPUS project:	We are ready to join to any new projects, which are related with development of medical education, distance forms of learning in medicine, development of computer technologies in higher education, etc.
4	Project proposal/description:	
5	Previous international experience:	TEMPUS project MUMEENA (Modernizing Medical Education in Eastern Europe Neighboring Area) http://www.mumeena.eu

Electronic Technical University in the context of distance learning development in Ukraine.

Acronym: EUniTech.

Target group: Ministry of Education, Science, Youth and Sports of Ukraine; Regional and Local Authorities; Universities’ administration, professors and non-teaching staff.

Consortium: three European universities with good experience in distance learning and three technical universities of Ukraine with no experience of distance learning.

Objectives:

Wider objective: The development of engineers training system according to Bologna process standards implementation through Ukrainian technical universities integration in distance learning sphere.

Specific objectives: Creation of interregional network of distance learning in the form of functioning Electronic Technical.

Training of teaching staff, modernization of curriculum, preparation of courses to be taught for the Electronic Technical University due to Bologna process standards with the help of best practices of European universities.

Creation of internet portal of Electronic Technical University.

Improvement of regulatory and legal framework of distance learning in Ukraine.

Activities:

1. Studying the best practices of distance learning in European universities.
2. Drawing-up proposals on Ukrainian regulatory and legal framework of distance learning improvement.
3. Designing Electronic Technical University internet portal.
4. Choosing specializations for the Electronic Technical University pilot project.
5. Conducting seminars, round tables, conferences to discuss topical questions on distance learning for engineers in Ukraine.

6. Project materials dissemination through projects internet portal.
7. Trainings in distance learning tools and methodology for teaching staff.
8. Modification and coordination of content and methodological supplement of distance courses between partner universities.

Results:

1. Distance learning departments, responsible for interregional distance learning network functioning, created in partner universities.
2. Interregional network of distance learning for technical universities in the form of Electronic Technical University created and functioning.
3. Curricula, courses content and methodological supplement for Electronic Technical University developed.
4. Teaching and non-teaching staff for the Electronic Technical University trained.
5. Cooperation between partner universities in the sphere of distance learning intensified.
6. Proposals on improvements in regulatory and legal framework of distance learning prepared.

Магістерські та PhD-програми напряму підготовки Комп'ютерна інженерія»

Коротка назва проекту: «МРСЕ»	
Національний спільний проект	
Пріоритет – Реформування навчальних планів і програм	
Цільова група: магістри, викладачі ВНЗ	
Контактна особа: Професор Лупенко Сергій Анатолійович	Контакти: тел.: 00380 352 52 41 33 e-адреса: lupenko@ua.fm
Попереднє партнерство: <ul style="list-style-type: none"> ▪ Польсько-Японський інститут інформаційних технологій, м. Варшава, Польща ▪ Політехнічна школа, м. Палезо, Франція ▪ Європейський центр навчання та ініціатив CESIE, Палермо, Італія 	<ul style="list-style-type: none"> ▪ Тернопільський національний технічний університет ім. Івана Пулюя, м. Тернопіль, Україна ▪ Національний технічний університет України "Київський політехнічний інститут", м. Київ, Україна ▪ Національний університет «Львівська політехніка», м. Львів, Україна ▪ Одеський національний політехнічний університет, м. Одеса, Україна ▪ Національний аерокосмічний університет ім. М. Є. Жуковського "ХАІ", м. Харків, Україна ▪ Міністерство освіти і науки, молоді та спорту України, м. Київ, Україна
Мета та завдання проекту:	
Загальна мета: <ul style="list-style-type: none"> ▪ Підвищення освітнього та наукового потенціалу фахівців у галузі інформаційних технологій, шляхом реформування навчальних планів та програм підготовки магістрів та PhD за спеціальностями «Комп'ютерні системи та мережі», «Системне програмування» та «Спеціалізовані комп'ютерні системи» на основі стандартів та положень Болонського процесу. 	
Завдання: <ul style="list-style-type: none"> ▪ Модернізація магістерських програм за спеціальностями «Комп'ютерні системи та мережі», «Системне програмування» та «Спеціалізовані комп'ютерні системи». ▪ Розробка PhD-програм за спеціальностями «Комп'ютерні системи та мережі», «Системне програмування» та «Спеціалізовані комп'ютерні системи». ▪ Розробка та впровадження навчальних курсів підготовки магістрів та PhD відповідно до вимог ринку праці та положень Болонського процесу. ▪ Впровадження сучасних методів та засобів змішаного навчання в процес підготовки магістрів та підвищення кваліфікації викладачів. ▪ Створення навчально-методичного комплексу українською та англійською мовами по магістерських та PhD програмах, що пройшли сертифікацію та державне визнання. ▪ Розвиток співпраці з провідними науковими установами та підприємствами в галузі ІТ. ▪ Запровадження механізмів сумісної підготовки магістрів та PhD в галузі «Комп'ютерна 	

інженерія».

- Поширення результатів проекту серед освітніх закладів-партнерів.

Напрями діяльності за проектом:

- Формування вимог та критеріїв якості викладацького складу та підготовки магістрів та PhD в галузі «Комп'ютерна інженерія».
- Формування вимог до навчально-методичного забезпечення підготовки магістрів та PhD в галузі «Комп'ютерна інженерія».
- Модернізація навчальних планів і програм підготовки магістрів за спеціальностями «Комп'ютерні системи та мережі», «Системне програмування» та «Спеціалізовані комп'ютерні системи».
- Розробка навчальних планів і програм підготовки PhD за спеціальностями «Комп'ютерні системи та мережі», «Системне програмування» та «Спеціалізовані комп'ютерні системи».
- Розробка сертифікованих курсів підготовки магістрів та PhD.
- Розробка та впровадження систем змішаного типу навчання.
- Організація спільних навчальних відео- та web-семінарів.
- Впровадження сучасних технічних засобів у навчальний процес.
- Підготовка магістерських та PhD-робіт практичного спрямування в рамках діючих науково-дослідних тем.
- Організація курсів підвищення кваліфікації викладацького складу.
- Визначення критеріїв та розробка механізмів оцінювання якості навчального процесу.
- Визначення критеріїв та розробка механізмів оцінювання якості підготовки магістрів та PhD.
- Розробка рекомендацій щодо впровадження результатів проекту серед освітніх профільних закладів.

Очікувані результати:

- I. Реформування навчальних планів і програм підготовки магістрів за спеціальностями «Комп'ютерні системи та мережі», «Системне програмування» та «Спеціалізовані комп'ютерні системи».
- II. Розробка навчальних планів і програм підготовки PhD за спеціальностями «Комп'ютерні системи та мережі», «Системне програмування» та «Спеціалізовані комп'ютерні системи».
- III. Створення навчально-методичного комплексу для підготовки магістрів та PhD за спеціальностями «Комп'ютерні системи та мережі», «Системне програмування» та «Спеціалізовані комп'ютерні системи» українською та англійською мовами, що пройшли сертифікацію та державне визнання.
- IV. Впровадження сучасних методів та засобів змішаного навчання в процес підготовки магістрів та PhD.
- V. Впровадження технології та засобів оцінювання якості підготовки магістрів та PhD.
- VI. Отримання міжнародних подвійних дипломів магістрів та PhD.
- VII. Підвищення рівня знань, мобільності та конкурентоспроможності магістрів та PhD на ринку праці.
- VIII. Рекомендації щодо поширення результатів проекту на інші спеціальності.
