

# Journal of International Mobility

## Moving for education, training and research

Journal of France's Erasmus+ Agency / Education and Training

### Call for papers

## 2014

Proposals should be submitted before **31 December 2014**

Contact: [revue@2e2f.fr](mailto:revue@2e2f.fr)

## Instructions

France's Erasmus+ Agency / Education and Training is the French national agency responsible for the European Erasmus+ programme for education and training. Every year it allocates more than €110 million of European funding to French players in education and training for mobility activities and European cooperation. Through the seminars and conferences it organizes, the studies and surveys it carries out and its participation in working groups, the Agency contributes to debate on sectoral, national and European issues in the field of secondary and higher education, vocational training and adult education.

Its transdisciplinary scientific journal, the Journal of International Mobility, publishes contributions relating to all aspects of international personal mobility in the context of education and training in Europe and in the world in general. Its primary aim is to further understanding of the conditions surrounding mobility and of its impact to help enlighten policy-makers whose role is to support and encourage it.

The first edition of the Journal was published in October 2013.

The agency is now launching a call for contributions for the third edition, which will focus on the

### **Economic and social impacts of mobility**

In Europe and around the world, the number of mobility activities is constantly growing. The European Commission has set ambitious objectives for mobility, whether for students, trainees or educators, and European and international programmes are investing ever more heavily in this field. These opportunities for mobility are expected to have a lasting impact on the individuals, systems, institutions and regions concerned.

Studies have already analysed the impact in terms of skills and have shown the added value of mobility in other countries. This third edition will focus on the economic and social impacts of mobility.

What contribution do mobility projects make to the economy of an institution, a region, a State, or Europe? How do companies benefit from these experiences?

What is the impact on social models, interpersonal and intercultural relations (during or after the mobility period), and the social mobility of the individuals concerned? Are we right in considering that there may be changes in identity or the emergence of global citizenship (European or planetary, depending on the geographical areas considered) which could be the result of these mobility projects?

Studies in these two fields will investigate mobility experiences in the framework of education and training projects involving apprentices, high-school and university students, trainees, teachers, non-teachers and researchers.

Scientists, experts and teachers who have taken an interest in these fields of research are invited to submit their contributions on the basis of studies either completed or still in progress, and also to submit the methods applied, together with the tools they may have had to develop for the assessments carried out.

## **How to submit**

Please send your contributions (full article) by email (Word document)  
to [revue@2e2f.fr](mailto:revue@2e2f.fr) before **31 December 2014**.

Each article will be read by the members of the reviewing committee and all authors will receive a response.  
Three responses are possible following your submission: publication in JIM 3, postponement for the 2016 edition, or rejection. The decision of the reviewing committee is final and is not subject to appeal.

Contributions may be submitted in the following languages: French, English, German and Spanish.  
This third edition is scheduled for publication in October 2015.

### **Format of contributions**

Typeface: Times New Roman 12

Submissions should include:

- the surname and first name of the author or authors (with only the first letters of both the surname and first name in uppercase),
- the institutional, scientific and academic references of the authors,
- an explicit Title, centred,
- an Abstract (of about 10 lines ) describing the research procedure followed and its main results,
- 3 to 5 keywords,
- a short Biography of the author,
- a Bibliography of the author's published works.

The maximum number of signs (33,000) shall include notes, spaces, the summary, keywords, and the bibliography.  
Articles must not exceed ten pages.

### **Bibliographical and electronic references**

These are listed at the end of the article, in alphabetical order.

### **Notes**

These must be in the form of footnotes, with a reference. Footnotes must be typed in Times New Roman 10.

### **Quotations**

Quotations (author or extract from an interview) must be inserted between quotation marks.

### **Formatting**

Italics will be used to indicate foreign expressions or words.

### **Graphic material**

Graphic material can be submitted with articles. Images must be in JPEG format.

### **To reference a website**

**Author**, First name (date of publication of the page). <Title of the page>, on the site *name of the site*. Consulted on <date>.

Address on the Web (url).
