

**Challenges in Pediatric and
Congenital Heart Disease**
From early life to adulthood

DAAD-project ID
57515210
www.chd-education.eu

Coordinator: Justus Liebig University Giessen

Partners: Onassis Cardiac Center, University of Athens, University of Crete

Participants: University of Cologne, Thessaloniki, Ioannina, Patras

We would like to **invite you to register** to a series of **live webinars in pediatric cardiology and adult congenital heart disease (ACHD)**, available at www.chd-education.eu

The **program Challenges in Pediatric and Congenital Heart Disease** (2020-2022) is funded by the German Academic Exchange Service (**DAAD**). It aims to strengthen German - Greek academic relations through joint research projects and the development of modern educational tools in the field of pediatric cardiology and congenital heart disease of adults.

The **webinars** aim to offer a stepwise introduction in pediatric cardiology and ACHD for **medical students, medical trainees, and physicians** with further interest in this fascinating scientific field. Experts in the field, from participant Institutions and invited speakers, will present a wide range of topics of all aspects of pediatric and ACHD cardiology and related scientific fields.

Registration to the webinars is **free**.

Timetable: The webinars will be offered **every second week** (Wednesday afternoon), unless otherwise specified, **starting on Wednesday May 12th**

You can visit the program's web site www.chd-education.eu for up-to-date information of the scientific program and for early registration. **As the webinar platform currently supports up to a maximum of 500 participants, registered users are also advised to login to the live webinars on a timely fashion as well.*

Looking forward for your active participation and valuable feedback!

Thank you
The Participant Institutions
