Erasmus +  
COALITION

## Workshop on Aligning syllabus components with I-SCP and completion of syllabus template as a follow up reflective session

### COALITION PROJECT

*Coaching Academics as Learners in Inclusive Optimal Networks*

By

**Dr. Katsampoxaki-Hodgetts, University of Crete**

**Coordinator of Teaching and Learning Centre TOTT**

In this workshop, the speaker will present key principles and components of lesson design dimensions of Backward design (BD) and Universal Design for Learning (UDL). Participants (teachers/academics) will be reflecting on these principles and key components during the workshop. They will use their existing syllabi in order to create a lesson plan that provides better opportunities for content presentation, student engagement, and assessment FOR learning. Participants will also be working in pairs or groups in order to provide and receive feedback from peers regarding their lesson plans. Then, working in groups, participants will be discussing the advantages and the disadvantages of Backward design and UDL and their feasibility in their own contexts.
